REV: V1.8

Date: 14/08/2023 17:40:10

Sheet: 1/1

This board has been based on:
<https://github.com/e-radioniacom/Lithium-ion-charger-with-protection---Eagle-files>

The original power supply of the GBC provide an 3VDC input (2 AA batteries or an AC adapter) and provides the operating voltage for the Game Boy Color (5 VDC, - 15 VDC and 13.6 VDC).

The minimum input voltage is 2 VDC and the maximum operating voltage is 4.6 VDC.
